

Easy Steps To Basic Sculptured Nails Using Your Machine and Lasco Diamond Instruments

1) Clean and Sanitize your hands, your customer's hands, and your implements. Remove any old nail polish.

2) Carefully rough the surface of the nail using an emery board. Do not thin the natural nail.

3) Gently brush the debris from the nail surface.

4) Apply your favorite nail primer.

5) Apply your favorite nail sculpture product.

6) Shape the sides of the nail with an emery board or Small Barrel.

7) Reshape and bevel the underside of the free edge of the nail using your Medium Football.

8) Clean the underside of the nail using your Medium Cone.

9) Using cuticle oil or water, buff the surface of the nail using your Extra Fine Barrel or your Ultra Fine Barrel.

10) Clean, manicure, and polish your customer's nails.

Manufacturing quality diamond instruments in the USA for over 40 years.

Your Choice 1/8" or 3/32" Shank Size - Please Specify Machine Type
Available Grits: X-Coarse, Coarse, Medium, Fine, X-Fine

WHY INSIST ON LASCO DIAMOND INSTRUMENTS?

The Lasco Nail Diamond Instrument was designed to be a state of the art tool of the trade. All Diamonds are not created equal. The Lasco Diamond is made with an exclusive multi-layer bonding process that causes several individual layers of natural diamond to be deposited on a concentric, stainless steel shank. This exclusive process allows the diamond particles to be positioned in an extremely uniform coating over the surface of the tool. No other company puts a denser coating of diamond on a tool than Lasco. This dense, uniform coating of diamond allows the lasco Diamond to cut faster, last longer, and leave a smoother finish than any other product.

Lasco Diamonds, made from 100% natural diamond, help to dissipate heat, not create heat. These instruments cut quickly and smoothly, without hurting your customers. Lasco Diamonds are designed to last. Simply soak them regularly in acetone to keep them clean and sharp. They will not rust. The more often you clean them, the better they cut and the longer they last. We recommend that you sanitize/sterilize your Lasco Diamonds before each use.

Money Back Guarantee - If, within 15 days, you are not entirely satisfied with your Lasco Product, you may return it for a full refund.

WHICH SHAPE TO USE

THE BARREL

The Barrel is used primarily on the top surface of the nail. This instrument is used to grind away the old sculpture material in preparation for a fill, or to shape a newly sculptured nail.

THE SMALL BARREL

The Small Barrel is a very versatile instrument which can be used both on the top of the nail, as well as underneath the nail. This instrument can be used like the Barrel, to prepare for a fill or to shape a new nail, and is small enough to fit under an average nail to clean sculpture product from underneath it.

THE CONE

The Cone is used primarily under the nail. This instrument is used to clean out the underside of the sculptured nail. Since the cone tapers down almost to a point and is safe ended. It can be used under very short nails.

THE FOOTBALL

The Football is used under the nail. This instrument is used to clean out the underside of the nail and around the cuticle area. This instrument is elliptical in shape, making it ideal for working underneath long nails, or grinding off the old sculpture material around the cuticle when preparing for a fill.

WHICH GRIT TO USE

ACRYLIC MATERIAL

Use the Coarse grit for heavy grinding or when using hard acrylic products. Use the Medium grit for light grinding or when working with soft acrylic products.

LIGHT CURED AND GEL MATERIAL

Use the Medium grit when working with these materials.

WRAP MATERIAL

Use the Fine grit when working with wrap materials.

WARNING

When grinding with your Diamond Instrument, you should constantly move the instrument across the area you wish to reduce, blending it with the rest of the nail. A Diamond Instrument will cut faster than any other instrument you have probably ever used. Care must be taken not to concentrate your grinding on a single spot, as the speed of the diamond will quickly remove too much material, leaving you with a low spot to repair. A Diamond Instrument rarely heats up since heat dissipation is a natural characteristic of diamonds. However, acrylic material does heat up with friction. By concentrating your cutting on a single spot, you cause the acrylic material to heat up, possibly burning your customer. By moving your instrument across a large area while grinding, or by removing small amounts of acrylic material, followed by a few seconds of rest, you allow the heat caused by friction to dissipate. Do not use a diamond or any other automated cutting instrument directly on the nail body. The thinning of the nail body will weaken the nail plate, subjecting the nail bed to possible injury.

LASCO SMALL HEAD DIAMONDS

3/32" Shank

\$8.75 Each

BUD and CC250

3/32" Shank

\$12.00 Each

BUD CC250

The BUD is a tapered rounded end barrel. The CC250 is used to cut your smile line when doing french fills. Both are available in X-Coarse, Coarse, Medium, Fine, X-Fine, and Ultra Fine.

SPECIAL EDITION DIAMOND SET

(LASCO 6 DIAMOND SET)

The Lasco Special Edition Diamond Set was designed to provide you with all the instruments necessary to do sculptured acrylic nails.

The Set Includes:

The Coarse Barrel for heavy filing and shaping. Use this bit when you have major filing to do, normally when preparing for a fill.

The Medium Small Barrel for lighter filing and shaping. Use this bit to remove small amounts of sculpture product, or to blend and shape the overall surface of the nail.

The Medium Cone is used for cleaning the underside of the sculptured nail. Use this instrument on nails that have Ω inch of free edge or less. It works great for removing glue or for smoothing out rough spots underneath the nail.

The Medium Football is used for trimming the area around the cuticle. Trims closer than nipping. It can also be used to clean the underneath nails that have more than a Ω inch of free edge.

The Ultra Fine Barrel is used as a buffing bit. Use this bit with cuticle oil or water to buff the acrylic nails. You will get a smooth, shiny finish, that will look great with or without polish.

The W22 is used to cut your smile line when doing french fills.

SPECIAL PRICE \$75.00

(includes Bit Holder)

BASIC SCULPTURE DIAMOND SET (LASCO 5 DIAMOND SET)

The Lasco Basic Sculpture Diamond Set was designed to provide you with all the instruments necessary to do basic sculptured acrylic nails.

The Set Includes:

The Coarse Barrel for heavy filing and shaping. Use this bit when you have major filing to do, normally when preparing for a fill.

The Medium Small Barrel for lighter filing and shaping. Use this bit to remove small amounts of sculpture product or to blend and shape the overall surface of the nail.

The Medium Cone is used for cleaning the underside of the sculptured nail. Use this instrument on nails with up to $\frac{1}{2}$ inch of free edge.

The Medium Football is used for cleaning under longer nails (over $\frac{1}{2}$ inch of free edge) and for trimming the area around the cuticle.

The Extra Fine Barrel is used as a buffing bit. Use this instrument wet, with cuticle oil or water, to get a very smooth surface. If the instrument is used dry, it will leave minute scratches.

SPECIAL PRICE \$67.50

W22 FOR FRENCH FILLS

Available in $\frac{3}{32}$ " or $\frac{1}{8}$ " Shank

Use the W22 to easily prepare for French Fills. The W22 establishes two reference guidelines. First, it establishes the new dividing line between the pink and white acrylics. Second, it creates a depth gauge to use as a guide while you remove the white acrylic with your Coarse Barrel. Remember to remove 70% of the thickness in order to prevent shadow lines. **SUGGESTED PRICE \$8.75 Each.**

ULTRA FINE BUFFING BITS

Available in $\frac{3}{32}$ " or $\frac{1}{8}$ " Shank

Tired of hand buffing? Try the new Ultra Fine Barrel or Ultra Fine Small Barrel. You'll be amazed at the results. Use this bit with cuticle oil or water to buff the acrylic nails. You will get a smooth, shiny finish that looks great with or without polish. These American Made, all natural diamond bits are fully sanitizable and sterilizable too. **SUGGESTED PRICE \$15.00 Each.**

MICRO DELUX NAIL MACHINE

(Micro Delux Machine pictured here with a 5 Diamond Set)

The Lasco Micro Delux machine is light weight, easy to use, and extremely portable. The unit comes complete with a variable speed 110 volt AC table top power controller/converter, a 12 volt DC micro motor handpiece, a shaft restraining pin, and a chuck wrench.

Use the table top dial speed control box to quickly adjust the handpiece to any desired speed up to a maximum of 25,000 RPM. The off/on switch is located in the handpiece for a quick and easy access. The machine accepts all 3/32 inch standard handpiece bits and includes a One Year Warranty.

LASCO MICRO DELUX NAIL MACHINE PACKAGE

We are sorry to inform your that the Micro Delux Nail Machine is currently out of production. We hope to resume production of this unit sometime in the future. In the meantime we are still able to repair most problems associated with this machine. We will do our best to keep your old existing machine in operation.
